STEEL COLUMN FORM

The heavy duty, all-steel Circular Column Forms provide consistently round, smooth concrete columns for building and bridge construction. Look at the comprehensive features of these Column Forms:

1. **3,000 psf pressure rating** allows for fast pour rates.
2. **Wide variety of standard sizes** available for rental or purchase. Sizes include:

Diameters:

18", 20", 24", 30", 36", 42",
48", 54", 60", 72", 84", and 96"

Lengths:

1', 2', 4', 8', 10'
(bolt together for desired height)

Other diameters and lengths for special conditions are always available for purchase.

3. **Accessories** include $\frac{3}{4}$ " Speed Bolts and Nuts for fast connections; lifting lugs for safe crane handling; bolt on ladders for worker access; and stripping wedges for fast cycling.

In addition, half sections can be used as bullnose forms with Symons standard wall forming systems. There is an extremely low maintenance cost, and the cost per formed column is less than with other type column forms after only moderate reuse.
